VHSS

Welcome to VHSS!

Valnesfjord Health Sports Centre (VHSS) is a rehabilitation institution on a specialist health service level, and can offer placement for children, young people and adults. Whether you are a patient, user, co-worker, student, associate or looking for job training, you are most welcome!

Our values

- Respect
- Equality
- Interaction

Who can make use of our services?

Through free choice of rehabilitation, you can choose VHSS no matter where you live. Our services to the various target groups may be a condition of relevant agreements. Nevertheless, we offer services to most people with different disabilities. We can also accept people who pay for their own placement or placements paid for by others.

Purpose and process

Admission to our facility is mainly by groups. Age, gender, function and diagnosis are taken into consideration when forming groups. Rehabilitation is based on each person's living situation and purpose of placement.

During the stay, each person is being supported by an interdisciplinary team according to his/her ability and need. Children and young people are being schooled during their stay.

Our emphasis is on opportunities rather than limitations through focusing on activities which promote self-coping and social participation. In order to offer the necessary support to everyone's own efforts, it will be of great significance that agencies in the home environment work together in order to achieve the best result.

Our staff include:

Occupational therapists, occupational consultant, dietitian, physiotherapists, health professionals, medical secretaries, sport educators, doctors, psychologists, speech therapist, riding instructor, social worker, nurses and special educators.

In addition, we employ a professional staff in other service functions – including technical department, stable, customer service, kitchen and cleaning.

Inter-disciplinary expertise

Our wide inter-disciplinary expertise, user participation and accountability enables each person to take control of his/her own life after the placement with us has ended.

We aim to be a professional beacon in inter-disciplinary re-/habilitation. As a specialist health service institution, we will perform analysis, treatment, supervision and training. All our services are a result of knowledge-based practice, and is in line with international standard for re-/habilitation (CARF).

We have our own R&D department, where we strive to measure the effect of rehabilitation. **National competence service for children and young people with disabilities** is located here, and we work together to promote fair and equal health services for children of all ages.

**Fremtiden er ikke bare noe som skjer.
Det er noe vi skaper sammen.**

Teknologi. Av og for mennesker.

ATEA

Activities and facilities

VHSS is situated in beautiful surroundings at the entrance of Sjunghatten national park.

Here, you will find universally designed activity areas, both inside and outside. We also have a range of activity aids for indoor and outdoor use.

Graving • Brøyting • Transport
Sentralgodkjenning og ADK1.

Vi tar jobben grav-alvorlig!

Facts about CARF

CARF (Commission on Accreditation of Rehabilitation Facilities) is an American non-profit organisation who has developed an international system for certification and accreditation of health and rehabilitation agencies. The system has been developed in close co-operation with user organisations, and is an internationally accredited quality stamp.
